

CERTIFIED NURSING ASSISTANT

CNA training course are designed to prepare students for career as certified nursing assistant. Nursing assistant perform delegated nursing task under the supervision of a licensed nurse. The course outline focuses on theories and supervised practical training in a simulation laboratory that will provide hands-on learning experience for the students. Our simulation laboratory is equipped to mimic the bedside clinical set up to fully immerse student in clinical experience.

Bedside teaching is a vital component of medical education and one of the most effective ways to learn clinical and communication skills. The course will prepare the students with the roles and responsibilities as a CNA. The range of function for nursing assistant varies among facilities and institution. The course outline will cover nursing assistant standards, role and limitations, job description, delegation process, maintaining competence and continuing education.
